I recomend this game to everyone except from people with heart disease and pregnant women. I only played for 30 minutes and im scared poo less DOWNLOAD IT. "TO GRAPPLE DOESN'T JUST MEAN TO SWING, BUT TO STRUGGLE! FACE DANGER WITH A HERO'S COURAGE AND PRIDE!"

A pretty cool action-adventure platformer with a lot of Sega Genesis V Mega Drive flair. Brings to mind a little bit of Treasure games like Mischief Makers and a little bit of Ristar. I was able to beat this game in 4 hours 3 minutes 48 seconds (roughly), all of which was livestreamed on Twitch. This was done at a hurried pace, only taking time to do a couple of side quests and always holding the button to make text display faster.

It's got quite a bit of quirky charm in its characters and setting and gets quite a bit of milage out of exploring different ways the grapple can work. (It doesn't always pull things to you). It's fun and cheery and colorful without ever getting too grim or dark. And even in places when things are at their worst, the game may throw a lampshade on it just to let you know "Don't worry, everyone survived! ...Somehow."

Most sound effects are sythesized effects that sound right at home on a 90s console, and the few that use voices (Example: "Target!") are compressed beyond the point of recognition, just as one would expect. Lovely!

The developer is actively responding to and working on feedback of the game, which is promising as it suggests this game will only get more refined in time.

A particular feature that I love is support for many control styles. It's playable with Keyboard Only, Keyboard and Mouse, Gamepad and Mouse, and Gamepad alone. Gamepad setup allows for a twinstick setup using one stick for aiming the grapple and another for movement with shoulder buttons for jumping and grabbing, or alternatively, aiming and moving with dpad/vstick and using facebuttons for jumping and grappling, just like Ristar! I love these options!

There are some flaws.

Gameplay Flaws: There are some cases where it won't be clear how to progress past a locked door or where a hidden switch is. The devs have already mentioned on Github that they intend to add more quality of life features in the future.

I also encountered a bug where I was able to skip level 1-5. While not entirely detrimental to me (I had played that level in the demo) or likely to be encountered in casual play, people who do skip it by mistake might be confused by the apparent gap in game progress. (Speedrunners will probably enjoy the easy timesave.)

Narrative Flaws: The story is there to facilitate the gameplay and cause to adventure, and while it occasionally poses some questions that provoke real critical thought about what the characters are doing, if you need a carefully constructed deeply-connected plot to enjoy the lore of a game, Grapple Force Rena's story will be infuriating due to some characters being discarded without clarification of their purpose, an ending with tonal clash against the rest of the game, and heavy use of Defeat Means Friendship. The characters are fun to get to know and interact with, but if you want to know more about the truth of this world, it's going to have to wait for supplementary material or a new game.

Also frustrating but not the developer's fault: The game doesn't capture very well with OBS. I was able to capture gameplay using a cropped Display Capture to capture everything on my screen with the game in fullscreen mode, and I was able to use Display mode cropped to capture the game when it's windowed, but any other combination of settings would just capture a black screen as often as it would get actual gameplay.

All in all, it's a cool game with a little bit of jank, but I absolutely intend to play through it again in the future. Recommended, especially if you're into Genesis-style action-platformers with simple combat and silly characters.

Plus, there is a boss in the game that dances to the boss battle music! You can dance with him! Or you can DESTROY HIM AND END HIS REVELRY. That alone was worth the price of entry, but if you're still on the fence, consider picking the game up on sale. It's a good time and not too difficult to learn. If difficulty is a concern, it offers assist options similar to Celeste's to adjust the game to the player's playstyle.

I absolutely recommend this game to fans of the genre!. The rules are simple, I dunno what those people are complaining about, but the lag. I can say for certain that this is the first game ever where I've lagged because I'm NOT the host. Unless your

opponent is fine with feeling like an epileptic that disconnects after 5 minutes and lets you host, this game is not playable.. I bought the game and couldnt even play it due to some error. And now just today I've downloaded Green Hell and that does'nt work either. I'm done with steam! They suck. Fun game so far. I only had to rage quit a few times from the difficulty, lol. Looking forward to trying it when my Oculus Touch arrives.. I had a ton of fun playing this game. It's a party-based RPG and it's really enjoyable. The world is pretty huge as well. Should provide tens of hours on fun. 8/10. Very nice although short puzzle game. The game encourages exploration by looking around and trying different kinds of interaction with the environment, which makes the puzzle solving all the more satisfying. The great sound design also plays into this, whether it's the nice background music, the rewarding "You got it!"-jingle when solving a puzzle or the fact that listening to the sound is part of the solution of some puzzles. Movement feels smooth and fun as well - I never experienced any feelings of dizziness or disorientation even when teleporting multiple times in a row.

Overall I can only recommend playing this if you own a supported VR headset, especially since the game is free.. Really cute and clever board game style game, but unfortunately quite far into it, I got stuck and it wouldn't give me any events to proceed so I never got to actually finish. Really disappointing as I had gotten pretty involved but I didn't want to start all over again.

Impossible/Really hard to get through most of the beginning..... Pretty hard to evaluate a game you cannot run (cmd window disappears immediately). Tried every recommendation (admin, etc) and never got it to run on my Win7 x64 system. Paid money for this.

So actually, I guess the review is easy.. Good mix of simulation and strategy, the game allows you to do both if you chose to. This game is where War of Warships got their inspiration from.. PAPS AND GRISZCZ

<https://youtu.be/vLYEbHNOSzY>. I purchased on the cheap through Green Man and was impressed by the previews in YouTube. An hour in and I'm enjoying this.

- * Part Yu-Gi-Oh summoning of monsters.
- * Part FFA Tactics positioning.
- * Part MTG colour/type-matching for support bonuses.
- * Sparkly anime art with perverted undertones.
- * Catchy soundtrack.

What really hits me for this game is how it gradually introduces you to the mechanics: the different roles monsters play, how card colour matters, special items/etc. It doesn't expect you to learn them all at once, but if you can figure them out, good; if you can't, it will clearly explain it to you. If you're really struggling, you can buy your way into a better deck either through real-world money or by farming past encounters to buy cards.

I would not call this game challenging, but a good gateway into more hardcore TCGs or tactical RPGs and something to relax to.. for the people who say it sucks then he sucks bro this game is cool and good i like it! but if the owner add some little stuffs like More weapons and more Snipers and other gamemodes will be rly fun!. For \$2 USD you can't really go wrong.... Very bad game and slow motion gameplay. Absolutely not recommend. Even though i have only played one and a half hours of this game, i already hate it. Was very hyped for this game and counting down the hours planning to get it, despite of all the bad reviews from console gamers that got it first. It is appalling that the developers do not care about the fact that this game is an unfinished product as i heard from some credible news sources, that they have sent 500,000 copies to distributors with no right of return. Yes no right of return!?! So all in all, it is a rubbish game unless you want to see tennis shots in slow motion.
